

Excavator GP Bucket

Side cutters
come standard to all Kerfab
Excavator GP Buckets

Dual Radius profile
bucket shell prevents
wear and allows the
bucket to self fill

Rear Wear Strips from
Bisalloy 400 and side wear
liners to protect bucket
frame

Side Bar
Full weld penetration of wing and
lip joint provides a strong and
durable method of securing the
lip to the bucket, while protecting
the joint from premature wear.

Product Specs

Fast Facts

- + Available for excavators from 1.5 to 55 Ton
- + 12 Month Manufacturers Warranty
- + Customisable to exact specifications
- + Large range of GET options

About

- + The strongest GP Bucket on the market
- + Bisalloy 80 lip, sidebar, and wings better protect the bucket and are able to withstand constant fatigue loading
- + The heavy duty fabricated torsion beam is designed to transfer digging force evenly throughout the bucket
- + The low profile ear brackets are hooked into the torsion beam to give better breakout force by keeping the pins as close to the bucket as possible.
- + Can fit any excavator make due to the Rhino Adjustable System

Kerfab's range of GP Excavator Buckets are available in a large range of widths, capacities, and machine sizes. Below is a short list of our most popular sizes.

Part No.	Width	Capacity	Fits Excavators
CR-RB14GP-1000-J300	1000mm	0.66m	12T - 16T
CR-RB20GP-1200-J350	1200mm	1.09m	18T - 27T
CR-RB30GP-1500-J460	1500mm	1.52m	30T - 35T
C-RB50GP-1760	1760mm	2.49m	45T - 55T

Optional Extras:

- + Bisalloy 400 Side Cutter bolt protectors
- + Large range of GET options
