

Hydraulic Fork Positioner

Kerfab's Hydraulic Fork Positioner is the ideal attachment for use in areas where there is minimal space and optimising it is crucial. These are often dangerous environments in which getting in and out of your machine poses a serious safety issue. This hassle-free attachment is a massive time saver due to its ability to shift the tines laterally for small adjustments all of which can be done from the comfort of your cab.

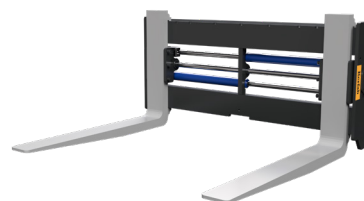

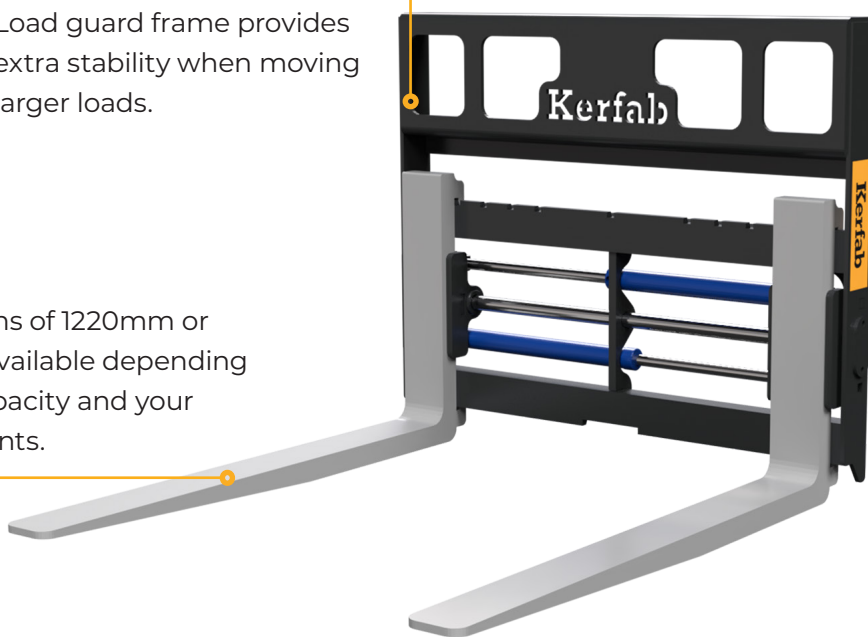

Key features at a glance:

- ▶ Hydraulically powered tines ensures excellent strength and control.
- ▶ Simply make minor adjustments for misaligned pallets.
- ▶ Ideal for organising loads onboard trucks, inside warehouses and distribution centers.
- ▶ Open back frame allows clear vision of pallet while lifting.
- ▶ Various capacities available.
- ▶ Compatible with telehandlers and wheel loaders.

2 YEAR
STANDARD
WARRANTY

Load guard frame provides extra stability when moving larger loads.

Tine lengths of 1220mm or 1530mm available depending on fork capacity and your requirements.
