

# Multipurpose Grab

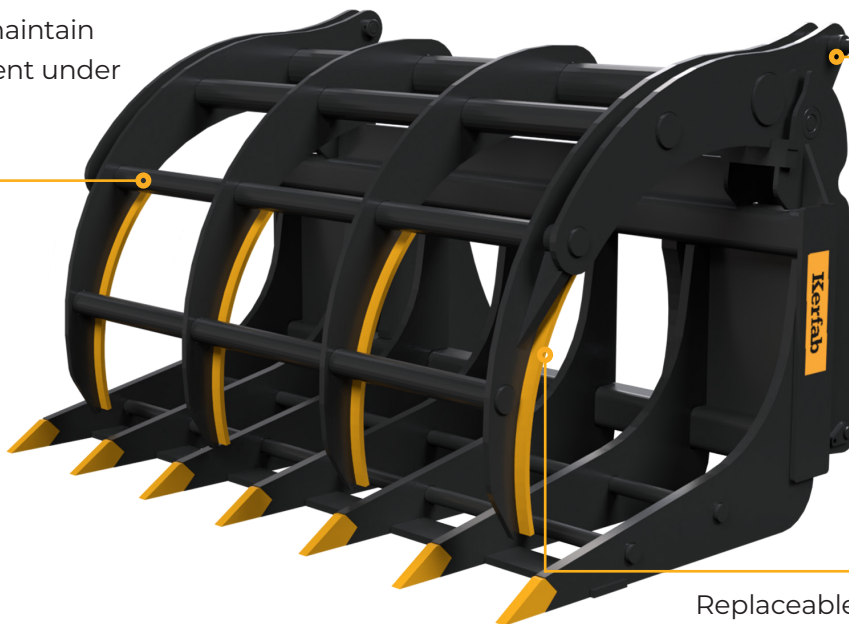

The Kerfab Multipurpose Grab is a versatile attachment built for handling a wide range of loose and irregular materials. It combines a semi-enclosed grab design with tine spacing to allow operators to grab, sift, and move material. It's commonly used to clear scrub in the paddock, load green waste or recyclables onto a trailer, and sort material in the yard.

## Key features at a glance:

- ▶ Well-spaced tines allow material to be grabbed while letting dirt or fine material fall through.
- ▶ Semi-enclosed grapple contains loose material during transport to reduce spillage.
- ▶ Hydraulic grapple provides strong clamping force for handling bulky or uneven loads.
- ▶ Available with hard or soft/finger tines to suit different applications.
- ▶ Range of widths and capacities to match machine size.

**2 YEAR**  
STANDARD  
WARRANTY

Multiple tine plates and cross tubes are arranged to distribute load evenly and maintain structural alignment under pressure.

Hydraulic ram linkage is positioned to provide controlled closing force across the full width of the grapple.

Replaceable wear edge options and high-tensile tine construction support durability in abrasive and high-impact applications.

## Specifications:

Part Number	Width mm	Capacity m <sup>3</sup>
WGW.MP18	1800	1.83
WGW.MP20	2000	2.04
WGW.MP21	2100	2.14
WGW.MP24	2400	2.45
WGW.MP25	2550	2.55
