

Sifting Bucket

The Sifting Bucket streamlines debris removal, allowing you to separate and dispose of materials quickly, safely, and efficiently. Perfect for construction sites, it handles bulky waste with ease while preventing loose dirt and soil from filling skip bins. It's the ideal solution to moving only the materials you want.

Key features at a glance:

- ▶ Easily sort through rubble, stones and other larger objects from dry, loose earth.
- ▶ Smaller material falls through the evenly spaced steel bars.
- ▶ Curved tine profile makes digging through materials smoother.
- ▶ Various widths and capacities available.
- ▶ Manufactured from high strength GR350 steel.
- ▶ Side edges protect the bucket shell for longer service life.

2 YEAR
STANDARD
WARRANTY

Sieve gap centres can be altered from standard widths to suit your requirements.

BIS500 cutting edge guarantees optimal strength and longevity. Option of teeth is available if required.

Wheel Loader Style

Telehandler Style

Skid plates fitted to the underside of the bucket, protect the base from harsh materials when digging.

Specifications:

Part Number	Width mm	Capacity m ³	Machine Compatibility
TBU.SI2108	2100	0.8	Telehandler
TBU.SI2412	2400	1.2	Telehandler
WBU.SI2415	2400	1.5	Wheel Loader
WBU.SI2420	2400	2	Wheel Loader
WBU.SI2725	2700	2.5	Wheel Loader
WBU.SI3030	3000	3	Wheel Loader
