- ▶ Built to handle heavy duty applications across various industries including, farming, waste management and construction.
- ▶ Various hitch mounts available to suit most machines.

2 YEAR
STANDARD
WARRANTY

It's ability to open in the middle acts as a grab which is commonly used to pull out fence posts, grapple green waste and clamp large rocks, logs and other debris.

Comes fitted with hardened cutting edges. Optional bolt-on edges or teeth are available to increase digging capability.

Optional teeth can be welded to the back plate to further increase grip making it easier to grab objects.
