

Telehandler Bale Fork

The ability to quickly and safely lift, move, and stack bales is essential on many farms in Australia. Kerfab has been working with Aussie farmers for over 30 years to build Australia's best Telehandler Bale Fork.

Kerfab's philosophy for our Bale Forks is that you shouldn't have to think about them, they should just work when you need them to. No bolt-on extensions and no fuss is exactly what you'll get with our Telehandler Bale Fork.

Key features at a glance:

- ▶ Built in skid gussets allow you bale fork to stand by itself safely.
- ▶ Strong and reliable Conus 2 tines won't bend or break while handling the densest bales.
- ▶ 4 or 5 tine configurations.
- ▶ Evenly supports the weight of the bale, preventing it from falling apart.
- ▶ Comes standard with a 1800mm high back frame.
- ▶ Designed to maximise visibility of your load from the machine cab.

2 YEAR
STANDARD
WARRANTY

Extendable back frame up to 2.7 meters can be operated hydraulically or manually with a simple sliding frame design.

Built to last with a 4-9mm thick steel frame that won't warp and twist when you lift a full load.

Available with 4 or 5 tines, depending on the size and weight of your hay bales.

Specifications:

Part Number	Tines	Bushes	Width mm	Back Frame Height mm
THF.ST3T18	3	5	1830	1800
THF.ST4T18	4	4	1830	1800
THF.ST5T18	5	5	1830	1800
