

Tractor General Purpose Bucket

Whether you're scooping, scraping, dumping or loading material, these core functions can be done with ease, with a General Purpose Bucket. It can be used to move all types of materials, but most commonly used for is gravel, dirt, and grain. Fabricated from high tensile steel, this attachment can withstand consistent hard labour without becoming deformed and breaking.

Key features at a glance:

- ▶ Ideal for widespread use and routine tasks on the farm or worksite.
- ▶ Medium and large profile styles available.
- ▶ Various widths and capacities.
- ▶ Top gusset on the back of the bucket made from GR350 steel, further strengthens and protects the bucket shell.
- ▶ Compatible with small to medium sized ag loaders.

Manufactured from high grade steel for optimal strength and durability.

Heavy-duty edge with replaceable teeth or wear edge options increases durability, making this bucket suitable for abrasive work.

Side edge further increases bucket strength and durability when handling more abrasive materials.

Specifications:

Part Number	Width mm	Capacity m ³	Style
UBU.MP1504	1500	0.4	Medium Profile
UBU.MP1805	1800	0.5	Medium Profile
UBU.MP2106	2100	0.6	Medium Profile
UBU.LP2106	2100	0.67	Large Profile
UBU.LP2407	2400	0.78	Large Profile
UBU.LP2709	2700	0.9	Large Profile
