

Tractor ITA Pallet Fork

Lift, load and move with confidence with a Kerfab Tractor Pallet Fork. It's important to ensure that you have the right attachment on your tractor so you can get tasks done effectively and safely. The ITA Tractor Pallet Fork has multiple latching points across the carriage which locks the tines in place securely. The distance between the tines can be easily adjusted to suit the desired width, depending on the size of what you're handling.

Key features at a glance:

- ▶ Robust, heavy-duty design.
- ▶ Safe and secure tine adjustment allows you to lift pallets of varying widths.
- ▶ Optional tine lengths of 1070mm or 1220mm.
- ▶ Various capacities available from 1000kgs up to 2500kgs.
- ▶ From small utility tractors to larger ag loaders, this Pallet Fork can be fitted with most hitch types to suit your machine make and model.

2 YEAR
STANDARD
WARRANTY

Tines are securely locked into place across multiple latching points on the carriage bar.

Open back frame allows for excellent visibility of the tines while inserting and lifting.

Comes standard with 1070mm long heavy-duty drop forged tines. These can be swapped out for 1220mm long tines if required.
