

Wheel Loader Bale Fork

Efficiency meets durability with a bale fork that just works. Kerfab believes in the simplicity of our Bale Forks: they're designed to function seamlessly without requiring any extra thought – just reliable performance when you need it. Our range of Wheel Loader Bale Forks are no exception to this.

Key features at a glance:

- ▶ Adjustable back frame extension are available for increased capacity.
- ▶ Skid Gussets on the bottom frame allow the bale fork to stand upright while not in use.
- ▶ Handles multiple round or square bales.
- ▶ Conus 2 tines provide optimal strength and durability while handling the densest bales.
- ▶ Standard frame height of 1800mm.
- ▶ Most hitch types can be fitted to suit your machine make and model.

2 YEAR
STANDARD
WARRANTY

Adjustable back frame, available in manual or hydraulic options. Extend out to a maximum 2.7 meters

Available with 3, 4 or 5 tine configurations.

Open back frame design gives operators maximum vision of the tines when piercing and lifting bales.

Specifications:
