

Wheel Loader Quick Hitch

Engineered for efficiency and reliability, the Kerfab Wheel Loader Quick Hitch streamlines attachment changes across a wide range of machine sizes and applications. Available in manual and hydraulic configurations, the redesigned system enhances locking visibility, reduces material ingress, and reinforces structural strength in high-stress areas — delivering consistent, dependable performance even in the most demanding environments.

Key features at a glance:

- ▶ Quick attachment changes improve overall machine utilisation, reducing downtime between tasks.
- ▶ Manual and hydraulic options allow the hitch to be matched to site requirements.
- ▶ Suitable for machines from 6 to 35 tonne operating weight.
- ▶ Cover Plate on front of hitch for increased strength in Central crowd Z-Bar area.

2 YEAR
STANDARD
WARRANTY

High visibility nylon indicator pins for instant feedback on pin position. The redesigned system reduces the risk of loose material entering the locking pin area.

Revised Crowd Back Stopper eliminates any interference with the top hook bending out.

Heavier Top Plate on Hitch Pin Lock area to increase overall torsional strength.
