# Cotton Bale Fork

# Cotton Bale Fork

The Cotton Bale Fork safely and effortlessly lifts and move single large round cotton bales.

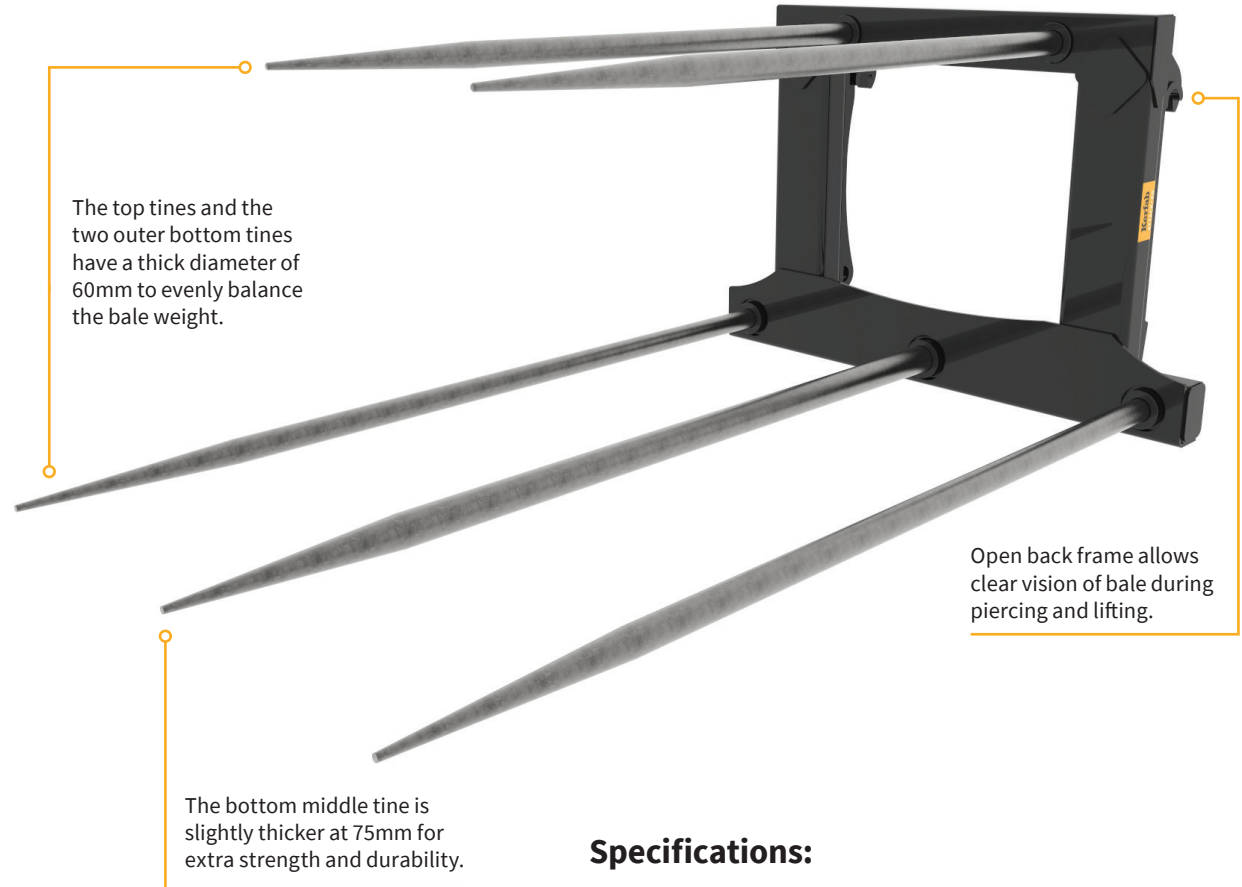

The tines are strong enough to support even the densest bales while delicate enough to ensure the bale wrapping remains undamaged.

With a standard frame size of 1.05m, the Cotton Bale Fork is available in a 3 and 5 tine configuration. The 5 tine design minimises stretching and plucking.

The fork requires no hydraulics and contains no moving parts. Replacement tines are readily available and easily fitted. Each fork is made to order and will come with the correct brackets and paint colour to suit your machine.

## Key features at a glance:

- + Tines are designed to smoothly glide through the bale, preventing any damage to the wrapping.
- + Maintains the integrity of the bale while lifting and moving.
- + Back frame height of 1.05m.
- + 3 tine or 5 tine designs available.
- + Compatible with telehandlers, wheel loaders, tractors or backhoes of various brands and models.
- + 2 year warranty.

## Specifications:

Part Number	Tines	Backframe height	Weight
LCBF3T	3	1050mm	530kg
LCBF5T	5	1050mm	600kg
