

WastePro High Dump Bucket

The WastePro High Dump Bucket is designed for applications where additional dumping height is required. Its pivoting bucket design allows operators to unload material over walls, into high-sided trailers, and into elevated processing equipment without requiring a larger machine. Whether loading green waste into transport vehicles, placing mixed recyclables into large bins, or unloading material into elevated storage areas, the High Dump Bucket provides additional reach and controlled material placement in busy waste facilities.

Key features at a glance:

- ▶ Increases dumping height for loading over tall obstacles.
- ▶ Suitable for mixed recyclables, green waste, and lightweight waste streams.
- ▶ Controlled tipping action assists with accurate material placement.
- ▶ Large-capacity design supports high-volume handling operations.
- ▶ Configurable to suit specific machine and application requirements.

2 YEAR
STANDARD
WARRANTY

Twin hydraulic ram design provides controlled bucket rotation during discharge.

Ram placement can be configured to suit operational requirements.

Bucket structure is engineered to manage the forces generated during repeated dumping cycles.

Pivoting front-edge design effectively extends machine dumping reach.

Specifications:

Part Number	Width mm	Capacity m ³	Style
WBU.HH2520	2500	2	Heavy Duty
WBU.HH2735	2700	3.5	Heavy Duty
WBU.HH3040	3000	4	Heavy Duty
WBU.HO2525	2500	2.5	Outer Pocket
WBU.HO2730	2700	3	Outer Pocket
WBU.HO3050	3000	5	Outer Pocket
WBU.HO3260	3200	6	Outer Pocket
