

Wheel Loader ITA Pallet Fork

Our Wheel Loader Pallet Forks are robust and renowned for their reliability. The ITA Pallet Fork offers great functionality with its multiple latching points positioned across the carriage. These latching points ensure the tines are firmly secured in place, increasing its stability while in operation.

Key features at a glance:

- ▶ Comes standard with tine lengths of 1070mm, 1220mm or 1520mm depending on required capacity.
- ▶ Loadguard or Clearview back frame styles available.
- ▶ Lifting capacities range from 1500kg to 8000kg.
- ▶ Ideal for use in various industries including, warehousing, mining, agriculture and manufacturing.
- ▶ Tines are fully adjustable across the width of the carriage bar.
- ▶ Compatible with most wheel loader makes and models.

WARRANTY

Loadguard frame increases stability and protects your machine from contact with heavy loads, preventing potential damage

◀ Loadguard Style

▼ Clearview Style

Shorter frame allows for optimal visibility of surrounding areas and gives operators a clear view to the end of the tines.
