

Adjustable Drop Forged Floating Tines Pallet Fork

Tines are connected to the back frame via a loop that can slide along the shaft for complete flexibility in matching pallet size

Open back frame allows clear vision of pallet while inserting and lifting

Floating tine design adjusts fork angle automatically as the pallet is lifted to maintain horizontality

Standard ITA 1070mm long tines can be switched out for 1220mm long tines with a high back frame

Fast Facts

- + 12 Month Manufacturers Warranty
- + Customisable to exact specifications
- + Floating Tines allow for quick adjustment
