

# Fixed Lifting Jib

A Lifting Jib is a secure and efficient solution to handling such loads in which the weight exceeds safe limits for manual handling. Lifting structural steel for buildings, moving plant and equipment and various other tasks can be done safely with a quality jib. Every Kerfab Jib meets Australian Standard 1418.8, ensuring safe and reliable performance.

## Key features at a glance:

- ▶ Standard length of 1500mm or 1800mm.
- ▶ Available in a range of capacities from 1500kg up to 5000kg.
- ▶ Ideal for handling loads that are bulky or have unusual dimensions.
- ▶ Compatible with ag loaders and wheel loaders.
- ▶ Easily lift loads out of areas that are less accessible with a pallet fork.

**2 YEAR**  
STANDARD  
WARRANTY

Heavy duty high tensile steel accommodates a wide range of loads.

Quality rated swivel hooks allow flexibility of rotation for better manoeuvrability and access to items being picked up.

## Specifications:

Part Number	Capacity kg	Length mm
WJI.LI1515	1500	1500
WJI.LI1520	2000	1500
WJI.LI1525	2500	1500
WJI.LI1530	3000	1500
WJI.LI1840	4000	1800
WJI.LI1850	5000	1800

### Important to note:

Kerfab cannot supply a load chart.

When attaching a lifting jib to your loader, Anti-drop or Lock Valves must be fitted to the loader once it is fitted. In some instances, loader management systems and lift charts may be required.
