

Wheel Loader High Dump Bucket

The Wheel Loader High Dump Bucket combined with its huge capacity and extended reach design, is your ultimate materials handling solution. Ideal for extending the reach of your wheel loader, having a High Dump on your machine is crucial if you're dumping materials over high-sided trucks, fences and other tall obstacles.

Key features at a glance:

- ▶ Multiple styles including light, medium and heavy duty designs.
- ▶ Handle a range of materials of varying densities.
- ▶ Hardened wear edge and rubber bump stops protects bucket shell.
- ▶ Hydraulic check control valve, self-lubing and replaceable pivot bushes for extra durability and reduced maintenance.
- ▶ Separate tilting frame is integrated into the bucket design, enabling it to pivot and tip from the edge.

2 YEAR
STANDARD
WARRANTY

Quality rams and fitting ensure longevity in harsh environments.

Wear plates, internal liners, trash guards and internal coatings can be fitted as optional extras to enhance suitability for various applications.

◀ Standard Design

▼ Outer Pocket Design

Outer pocket design moves the rams to the outer edge of the bucket so sticky materials don't get stuck in corners.

Specifications:

Medium Duty

Part Number	Width mm	Capacity m ³
WBU.HM2415	2400	1.5
WBU.HM2425	2400	2.5
