**NEW**

## **4 IN 1 BUCKET**

BUILT FOR SKID STEERS.  
READY FOR ANYTHING.

**2** YEAR  
STANDARD  
WARRANTY

## We took our time—and it shows.

After 12 months of rigorous design and testing, Kerfab's Skid Steer 4 in 1 Bucket is ready—and worth the wait. This is not just another bucket. It's a heavy-duty, multi-functional workhorse engineered for serious operators who demand more from their equipment.

Whether you're scooping, grading, dozing, or grabbing—this bucket does it all. And it does it with the strength, precision, and longevity you've come to expect from Kerfab. This bucket might be the last one you ever need. But once you use it, you'll probably want another one.

- ▶ **Built to last** – 20mm 450 Grade Q&T steel base for extreme wear resistance.
- ▶ **Reinforced design** – One-piece 6mm GR350 steel back skin for superior strength.
- ▶ **High-performance hydraulics** – Motus 6" cylinders deliver up to 4,900kg of force.
- ▶ **Clevis-style pivot** – Durable, proven, and binding-resistant under heavy load.
- ▶ **Protected hoses** – Routed for damage prevention and easy replacement.
- ▶ **Operator visibility** – Slotted spill guard offers clear sightlines and entry step.
- ▶ **Easy maintenance** – Open cylinder cut-outs for hassle-free cleaning.
- ▶ **Extra grip** – Serrated clamping edges handle awkward loads with confidence.
- ▶ **Greasable pins and bushes** – For long-term smooth operation.
- ▶ **Yellow cylinders** – No performance boost. But they look great!
- ▶ **Lock valve** – Ensures the bucket jaws remain in the position the operator left them, preventing loss of material or clamped objects dropping from the bucket.

Visit the website for more information.

## 1. Scoop & Dig

Use the bucket like a traditional bucket to move loads of soil, gravel, sand, or other material. The opening function offers an increase in reach as operators can dump without having to tilt the bucket down as well as reduces the risk of hitting the sides of trucks and trailers.

## 2. Grab

The powerful rams give unmatched clamping force allowing operators to grab long, bulky, or heavy items and move them with ease. The serrated teeth on each side of the bucket offer increased grip.

# FOUR FUNCTIONS ONE TOUGH TOOL

## 3. Doze

Use the base and back plate of the bucket to push bulky material like a dozer would. Quickly push bulk loads of debris into piles to make for easier clean up.

## 4. Grade

Leave sites with a smooth, level finish by using the edges to grade and/or backblade. The optional 3 bolt on edges are recommended for operators intending to regularly use their bucket for grading.

## Options

### 1 x bolt-on edge

Adds durability to the leading edge of the bucket. Ideal for general use, scraping, or reversing over hard surfaces. Reversible to extend life.

### Teeth

For digging into tough ground or handling compacted material. Can be fitted instead of the front edge.

### 3 x bolt-on edges

Bolt on edges (front, middle, back). Protects all high wear edges, recommended for those who do a lot of dozing, grading, or clamping.

### Custom paint options

Tailor your bucket to match your fleet, promote your brand, or simply suit your machine's colourway. Not sure what works best? Talk to us or your dealer—we'll help you find the perfect fit for your setup.

## Warranty

Backed by a family-owned company true to its values, we proudly offer double the industry standard warranty on Skid Steer 4 in 1 Buckets—not because we have to, but because we can. Buying from us means more than just getting the product; it means getting the support behind it.

Our BackUp+ promise ensures fast, reliable help when you need it, with Kerfab-approved technicians across Australia. No waiting on parts from overseas, no runaround—just proper backup from people who know the gear and how to get you moving again.
