

Telehandler ITA Pallet Fork

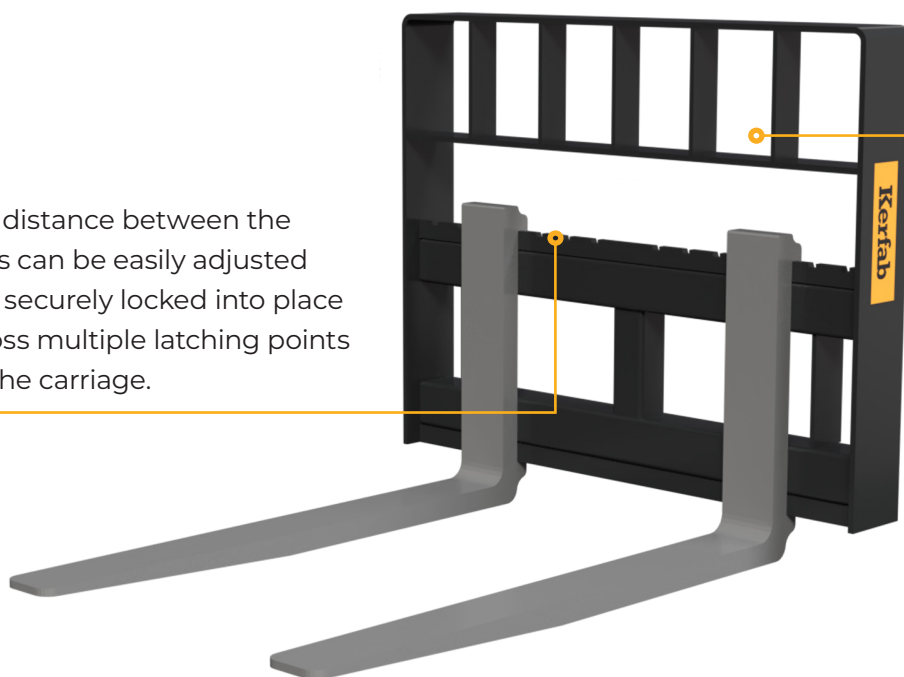

Transport your load safely and efficiently with a Kerfab Telehandler Pallet Fork. Designed specifically for use on telehandlers in the agricultural and civil construction industries, its robust build won't let you down. Features adjustable heavy-duty tines, that measure 1220mm long and is available with a capacity up to 6000kg's.

Key features at a glance:

- ▶ Comes standard with a Load guard which provides extra strength for heavy-duty lifting and protection against potential load damage.
- ▶ Drop forged tines offer excellent strength and durability.
- ▶ Tines are securely locked into place across the carriage.
- ▶ Clearview or High Backrest frames available depending on your requirements.
- ▶ Can be fitted with most hitch types.

2 YEAR
STANDARD
WARRANTY

The distance between the tines can be easily adjusted and securely locked into place across multiple latching points on the carriage.

Open back frame enables maximum visibility and increases operational safety.
