

# Backhoe 4 in 1 Bucket

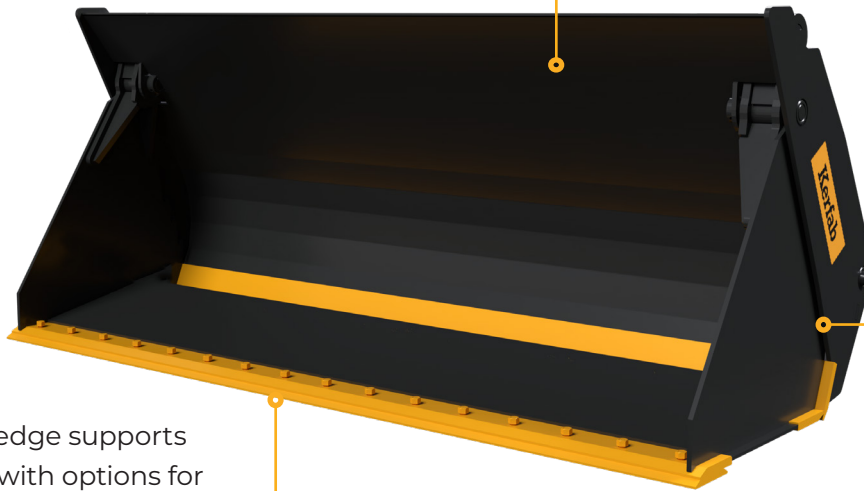

The Kerfab Backhoe 4 in 1 Bucket is a multi-function bucket built to dig, scoop, dump, doze, clamp and grade with one attachment. It gives operators a practical way to handle day-to-day jobs without changing tools all the time, whether that is stacking and cleaning up in the shed, moving debris around the yard, loading out onto a trailer, or spreading topsoil and mulch in the paddock.

## Key features at a glance:

- ▶ Handles digging, scooping and dumping as a conventional bucket.
- ▶ Flexibility to empty material from the front or through the middle when levelling or spreading.
- ▶ Available in a range of widths and capacities.
- ▶ Clamps onto green waste, logs, tree trunks, rocks and debris for more secure handling.
- ▶ Can bulldoze material and assist with jobs like pulling fence posts and cleaning up worked areas.

**2 YEAR**  
STANDARD  
WARRANTY

The bucket is engineered as a multi-function platform, allowing it to carry bucket work, clamping work and grading work in one structure.

Hardened cutting edge supports digging durability, with options for replaceable hardened teeth and wear edges where extra edge life is needed.

The centre opening is designed to give controlled material release for spreading and levelling tasks, rather than relying only on full front tipping.

## Specifications:

Part Number	Width mm	Capacity m <sup>3</sup>
B41.BL20	2000	0.87
B41,BL21	2100	1
B41.BL24	2400	1.05
