

# Wheel Loader Stick Rake

The Kerfab Wheel Loader Stick Rake is designed for large-scale land clearing and handling heavy, abrasive material. It allows operators to move large volumes of debris while separating soil and maintaining control across the full rake width. It's suited to pushing fallen timber in the paddock, clearing scrub in the yard, and windrowing debris for loading or burning.

## Key features at a glance:

- ▶ Medium and heavy duty designs available.
- ▶ Wide rake profile handles large volumes of material across broad working areas.
- ▶ Even tine spacing allows dirt to fall through while retaining larger debris.
- ▶ Angled top bar helps contain and carry material without it rolling over the back.
- ▶ Bottom cutter bar supports scraping loose material without digging into the ground.
- ▶ Designed for large wheel loaders with quick hitch compatibility.

**2 YEAR**  
STANDARD  
WARRANTY

Reinforced frame with multiple cross members supports load distribution across the rake width.

High-strength steel tine construction is arranged for repeated ground engagement and impact resistance.

Integrated cutter bar along the tine line supports consistent ground contact and material separation.
