

Dozer Blade Stick Rake

The Kerfab Dozer Blade Stick Rake is a dual-purpose attachment that combines a dozer blade with a fold-away stick rake. It allows operators to switch between clearing, raking, and grading without changing attachments. It's suited to pushing up limbs along fence lines, clearing around trees in the paddock, and then grading tracks or cleaning out drains in the yard. The fold-away rake design lets you move from raking to blade work quickly using the machine's tilt function.

Key features at a glance:

- ▶ Fold-away rake allows quick transition between raking and dozing functions.
- ▶ Built for pushing scrub, limbs, and debris in agricultural applications.
- ▶ Blade function supports grading, levelling, and clearing soil build-up.
- ▶ Optional manual or hydraulic tilt and angle adjustment for better control.
- ▶ Compatible with a range of machines including telehandlers, ag loaders, and skid steers.

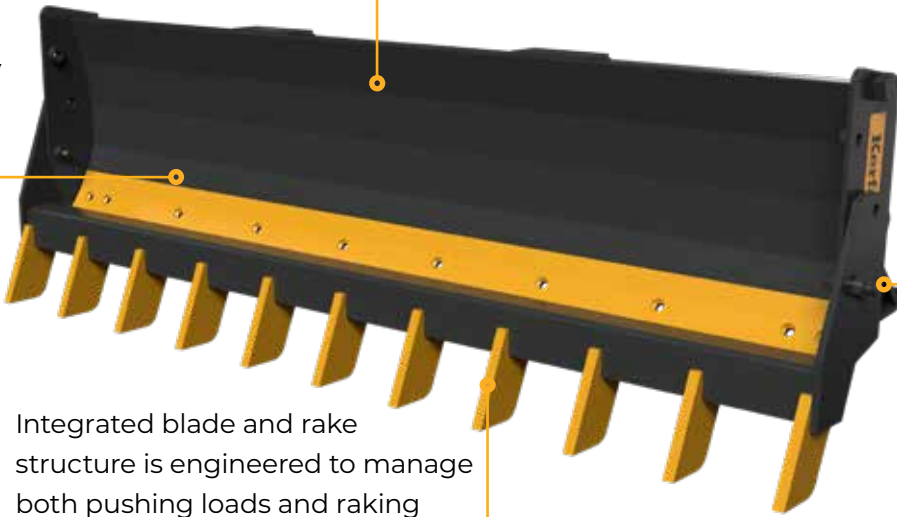

Mounting and adjustment points are arranged to maintain stability during angled or offset operation.

High-tensile steel construction supports durability under repeated impact and ground engagement.

Fold mechanism uses the machine's tilt action to reposition the rake while maintaining structural alignment.

Integrated blade and rake structure is engineered to manage both pushing loads and raking forces across the attachment.

Specifications:

Part Number	Width mm	Height mm	Tines	Machine Compatibility
UBL.DS18	1800	600	9	Ag Loader/Telehandler
UBL.DS21	2100	600	11	Ag Loader/Telehandler
UBL.DS24	2400	600	13	Ag Loader/Telehandler
TBL.DS27	2700	600	15	Telehandler
TBL.DS30	3000	600	17	Telehandler
