

Silage Bucket Grapple

The Kerfab Silage Bucket Grapple is a general-purpose silage handling attachment designed to scoop, carry, and place feed material with control. It combines a bucket base with hydraulic grapple arms to hold and contain silage during transport. The bucket and tine combination allows you to penetrate into silage, lift cleanly, and place material exactly where needed.

Key features at a glance:

- ▶ Hydraulic grapple arms hold silage securely during transport.
- ▶ Sharp tines assist with penetrating compacted silage.
- ▶ Bucket profile supports scooping and carrying material with reduced spillage.
- ▶ Suitable for a range of feeding and material handling applications across farms.
- ▶ Quick hitch compatible for fast changeover between attachments.

2 YEAR
STANDARD
WARRANTY

Integrated grapple arm assembly is positioned for balanced clamping force across the bucket width.

Reinforced bucket structure and internal stiffening support load distribution during heavy silage handling.

Wear edges and base plates are arranged to manage abrasion during repeated loading cycles.

Specifications:

Part Number	Height mm	Tines	Capacity m ³	Machine Compatibility
UGS.SB18	1800	8	0.95	Ag Loader
UGS.SB21	2100	10	1.1	Ag Loader
UGS.SB24	2400	12	1.45	Ag Loader
TGS.SB2418	2400	11	1.8	Telehandler
TGS.SB2424	2400	11	2.4	Telehandler
