

Floating Style Pallet Fork

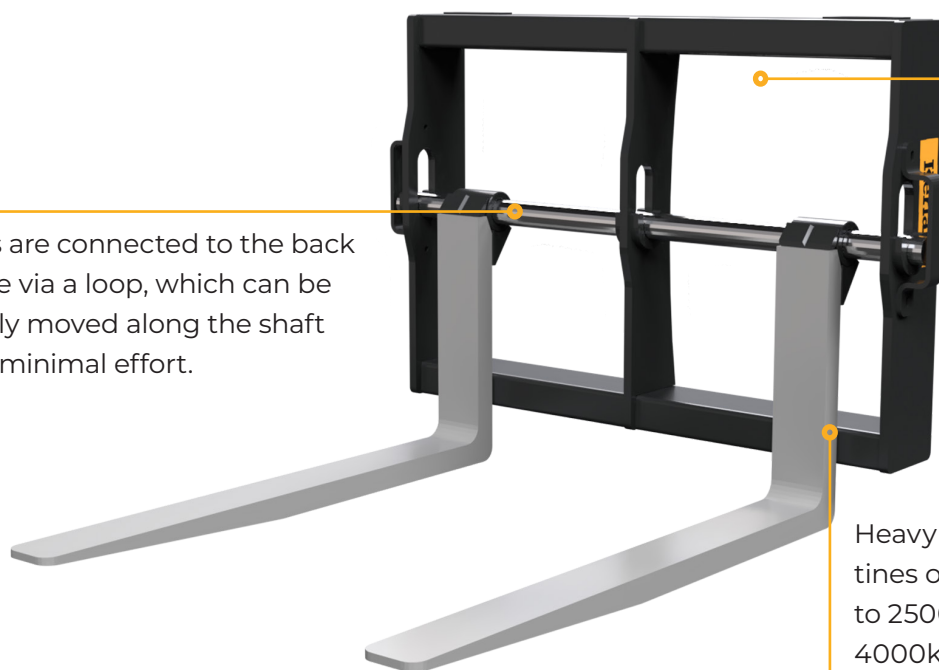

Kerfab's Floating Pallet Fork is a versatile attachment designed for safe, efficient material handling across agriculture and construction industries. Its floating tines automatically adjust to uneven terrain, maintaining load stability. Heavy-duty forged tines and an open-back frame ensure durability and clear visibility.

Key features at a glance:

- ▶ Multipurpose attachment that can adapt to fit any pallet size.
- ▶ Locking pins on either side of the fork frame can be simply removed when required.
- ▶ Floating tines allow for quick adjustment.
- ▶ Standard 1200mm wide back frame.
- ▶ Optional high back rest available for extra stability.
- ▶ Compatible with ag loaders and telehandlers.

STANDARD
WARRANTY

Tines are connected to the back frame via a loop, which can be simply moved along the shaft with minimal effort.

An open back frame allows the operator to have a clear view of the pallet while inserting and lifting.

Heavy duty dropped forged tines offer a lifting capacity up to 2500kgs for tractors and 4000kgs for telehandlers.

Specifications:

Part Number	Capacity kg	Width mm	Tine Length mm	Machine Compatibility
UPF.121010	1000	1200	1070	Ag Loader
