

Telehandler General Purpose Bucket

As the name implies, this bucket is a versatile choice for general use. From hobby farms to larger agricultural businesses, demolition and construction sites to industrial operations the Telehandler General Purpose is your ideal attachment, if you're frequently moving various types of materials. Its the perfect all-rounder that can be used to move all types of materials with a density up to 1600kg/m³

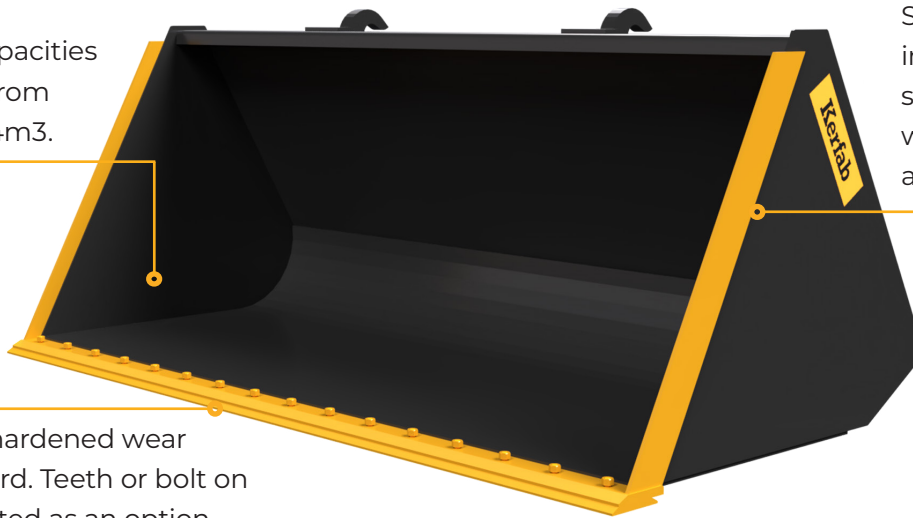

Key features at a glance:

- ▶ Manufactured from high-grade steel for guaranteed strength and durability.
- ▶ Comes with hardened wear edge for heavy-duty use. Bolt on edge option available.
- ▶ Various sizes available.
- ▶ Handle asphalt, dirt, soil, rubble, silage, debris and other abrasive materials with ease.
- ▶ Built for telehandlers and can be fitted with most hitch types to suit your machine.

Bucket capacities available from 0.5m³ - 1.4m³.

Side edge further increases bucket strength and durability when handling more abrasive materials.

Comes with a hardened wear edge as standard. Teeth or bolt on edge can be fitted as an option.
