

Telehandler Light Materials Bucket

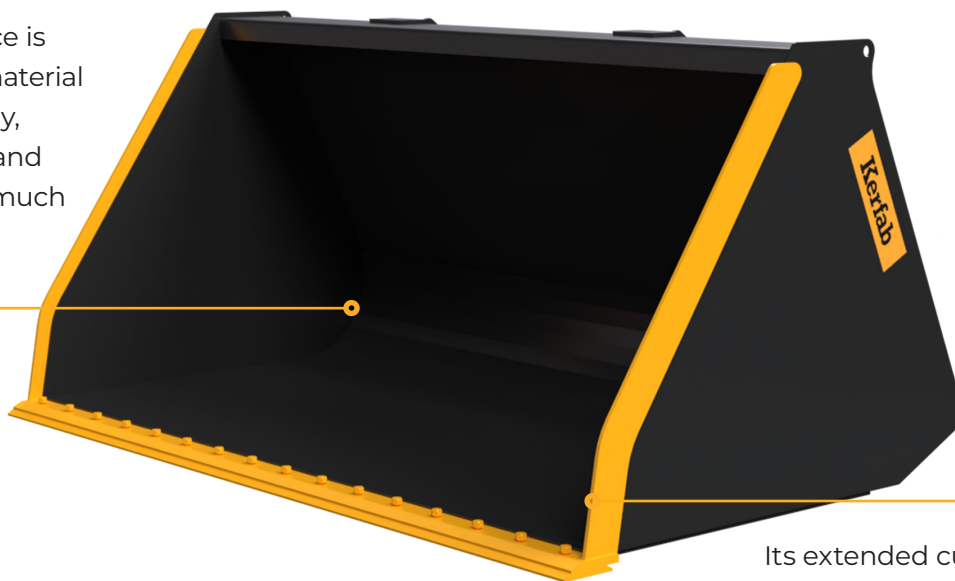

Designed to move as much material as possible, as efficiently possible, the Light Materials Bucket is designed for easy handling of low-density materials up to 800kg/m³, such as sawdust and grain. It features a large capacity and a hardened wear edge, with an optional bolt-on edge for improved digging and extended durability.

Key features at a glance:

- ▶ Designed to maximise efficiency.
- ▶ Manufactured from high strength GR350 steel.
- ▶ Various bucket sizes available, with capacities up to 4.0m³.
- ▶ Optional bolt on double wear edge available for increased breakout force and bucket protection.
- ▶ Can be fitted with most hitch types to suit a range of telehandler makes and models.

2 YEAR
STANDARD
WARRANTY

Rolled inside surface is designed to help material empty out smoothly, reducing build-up and making clean-out much simpler.

Its extended curved front section is designed to minimise material spillage.

Specifications:

Part Number	Width mm	Capacity m ³
TBU.LM2113	2100	1.3
TBU.LM2415	2400	1.5
TBU.LM2420	2400	2
TBU.LM2425	2400	2.5
