

Telehandler Rehandling Bucket

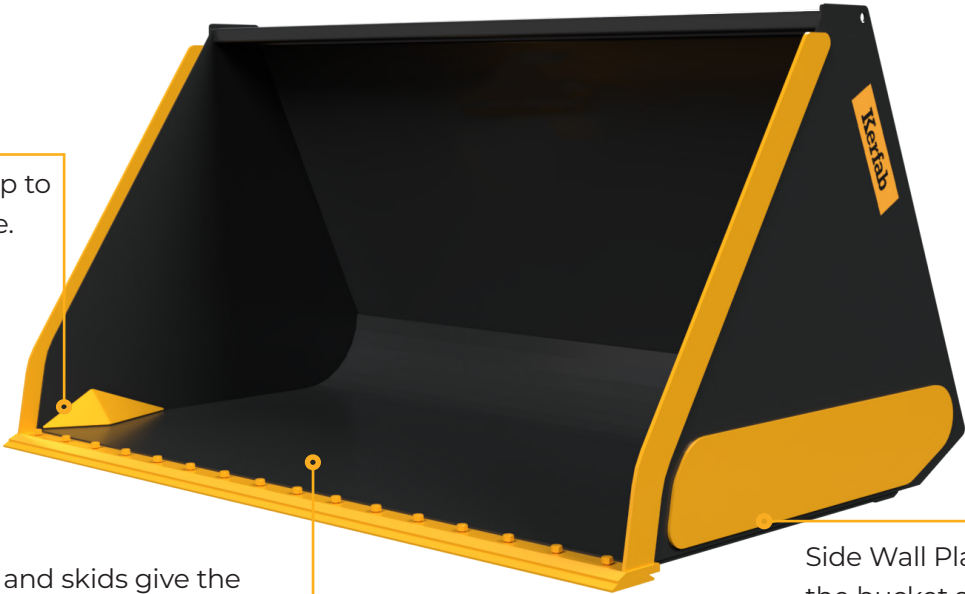

The Telehandler Rehandling Bucket is designed for durability and high capacity, handling materials like sand, gravel, and aggregate up to 1,200kg/m³. Its robust build includes corner gussets, side plates, and a reinforced base for strength and longevity. Ideal for short-cycle tasks and load-and-carry.

Key features at a glance:

- ▶ Optimised for applications requiring moderate breakout force.
- ▶ Designed to move large quantities of harsh material a Light Materials Bucket can't handle.
- ▶ Various sizes available.
- ▶ Suitable for use in a range of agricultural and construction applications.
- ▶ Built for telehandlers and can be fitted with most hitch types to suit your machine.

Corner Gussetts help to strengthen the base.

Heavier base and skids give the bucket greater breakout force.

Side Wall Plates give the bucket shell added protection.

Specifications:

Part Number	Width mm	Capacity m ³
TBU.RE2415	2400	1.5
TBU.RE2420	2400	2
TBU.RE2425	2400	2.5
