**NEW**

## **K-BROOM**

ENGINEERED FOR MAXIMUM  
SWEEPING EFFICIENCY

**2 YEAR**  
STANDARD  
WARRANTY

# The optimal solution for cleaning and moving large amounts of materials efficiently and with ease, especially across large areas.

Save time, money and effort with the K-Broom, by reducing the amount of manual labour required. This sweeper can be used across multiple industries, including agriculture, civil construction and waste and recycling.

Get rid of mould, clear grain, bark, gravel, sand, compost, silage, timber, metal recycling materials, aggregates and almost any other small loose materials in one clean sweep.

## Features and benefits

- ▶ Fitted with 7 full rows of quality polypropylene bristles which can be easily replaced when worn, although this is rare as the bristles are rated over 1,000km.
- ▶ Low maintenance – just clean the brushes and rinse them off. There's no need to hang it up for storage either—simply set it in a corner of your workshop on its brushes, which are strong enough to support the entire weight.
- ▶ The high density and premium quality of our brushes deliver efficient sweeping on any surface. With multiple rows, the brush setup adapts easily to all types of soil and terrain.
- ▶ Sturdy frame design manufactured from thick folded steel ensures optimal strength and durability.
- ▶ K-Broom is compatible with telehandlers, tractors, and forklifts. Various hitch types can be fitted to suit your machine's make and model.
- ▶ Made in Australia for guaranteed quality and excellent after sales support.
- ▶ Backed by a 2 year warranty.

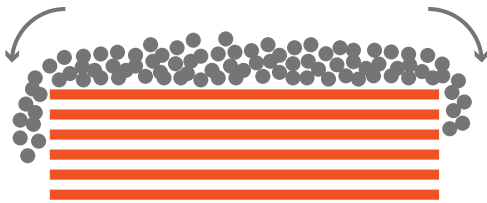

## Advanced bristle layout for efficient sweeping

The K-Broom features a unique arrangement of bristles, with multiple straight rows at the rear and three angled rows at the front. This configuration keeps material collected in front of the broom, reducing the number of passes needed to clean an area thoroughly.

K-Broom also improves performance when sweeping along curbs, walls, and other obstacles. The difference in sweeping efficiency is clearly illustrated in the diagram below.

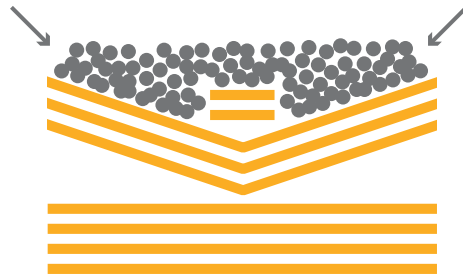

### Competitor Sweeper

Materials easily spill over the sides of the bristles making the sweeping action less effective.

### K-Broom

Unique bristle design eliminates side spillage resulting in a more efficient sweeping action.

## Specifications

Part Number	Width mm	Height mm	Depth mm	Weight kg	Rows of Bristles
SW.SK15	1520	300	800	145	9
SW.SK18	1820	300	800	155	9
