

Bale Boss

The Kerfab Bale Boss is a heavy-duty bale clamp built for steady, controlled bale handling during feeding, stacking and transport. It securely grips round and square bales so you can lift, move and place them exactly where they're needed — whether that's stacking in the shed, loading a mixer wagon or positioning feed in the paddock — all from the cab.

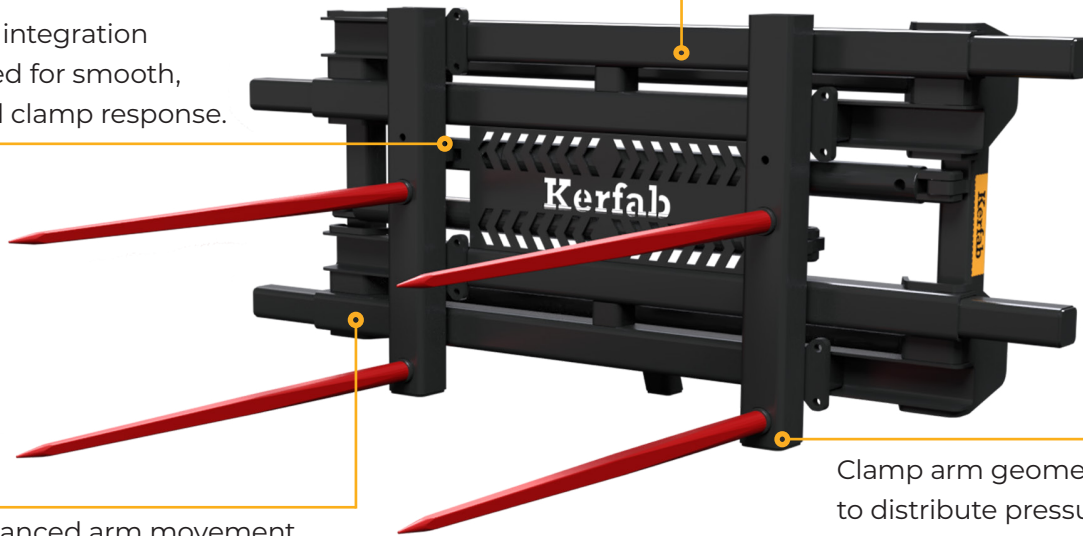

Key features at a glance:

- ▶ Securely grips wrapped bales without puncturing or tearing wrap.
- ▶ Open and close the clamp from the cab for controlled placement and repositioning.
- ▶ Wide clamp opening up to 2.75m accommodates varying bale sizes.
- ▶ Heavy-duty structural frame built for repeated daily handling.
- ▶ Designed with safety, visibility and straightforward maintenance in mind.

2 YEAR
STANDARD
WARRANTY

Hydraulic integration engineered for smooth, controlled clamp response.

Reinforced high-stress zones built to manage lifting and transport loads.

Balanced arm movement to maintain alignment and predictable bale containment.

Clamp arm geometry designed to distribute pressure evenly across the bale surface.
