

Square Bale Fork

Handling hay bales shouldn't be a time-consuming and dangerous task. You need a hay fork that simply works and fits perfectly every time. It's designed to safely handle individual or multiple bales both round and square. Stack, transport, load and lift hay bales with ease.

Key features at a glance:

- ▶ Strong, durable design, built from high-quality steel for long lasting use.
- ▶ Maximise your capacity with an extendable back frame, available in manual or hydraulic options.
- ▶ Can be fitted to Skid Steers.
- ▶ Fork frame has been engineered to maximise the visibility of the tine ends and surrounding areas from inside the cab.
- ▶ Suited to all tractor sizes with a hp between 35-200hp.

2 YEAR
STANDARD
WARRANTY

Various tine configurations available. Option of 3, 4 or 5 tines can be fitted to the frame, depending on the size and weight of your bales.

Curved steel top frame allows for greater stability when picking up and moving multiple bales.

Strong conus 2 tines measuring 1250mm long, enable you to pick up dense bales without bending or breaking.

Specifications:

Part Number	Back Frame Height mm	Tines	Bushes
UHF.SQ3T15	1500	3	5
UHF.SQ4T15	1500	4	4
UHF.SQ5T15	1500	5	5
