

# High Capacity Waste Bucket

The WastePro High Capacity Waste Bucket is designed to move large volumes of waste material efficiently across transfer stations, recycling facilities, and resource recovery sites. Its high-capacity profile makes it ideal for bulk handling applications where material volume is a priority. Whether loading green waste into trailers, moving co-mingled waste around the yard, handling mulch stockpiles, or transporting recyclable materials between processing areas, this bucket is built for continuous high-volume operation

## Key features at a glance:

- ▶ High-capacity design for bulk waste handling applications.
- ▶ Suitable for green waste, mulch, co-mingled waste, and recyclables.
- ▶ Trash guard helps reduce material spillage and protects the hitch area.
- ▶ Configurable to suit different waste streams and machine requirements.
- ▶ Designed for continuous use in demanding waste management environments.

**2 YEAR**  
STANDARD  
WARRANTY

Optional internal liners assist with wear management and service life.

Strengthened internal stiffeners help manage structural loads during high-volume operation.

Bucket structure is engineered specifically for waste handling applications and machine compatibility.

Bolt-on edges and heel plates support maintenance and component replacement.

## Specifications:

| Part Number | Width mm | Capacity m <sup>3</sup> |
|-------------|----------|-------------------------|
| WBU.HC3680  | 3600     | 8                       |
| WBU.HC3690  | 3600     | 9                       |
| WBU.HC3610  | 3600     | 10                      |
