

Multipurpose Waste Grab

The Multipurpose Waste Grab is designed for handling bulky, awkward, and difficult-to-contain materials that are not easily managed with a conventional bucket. Its powerful clamping action allows operators to securely lift, carry, and place a wide variety of waste streams while maintaining control of the load. The Multipurpose Waste Grab provides the flexibility to manage diverse waste materials with confidence.

Key features at a glance:

- ▶ Securely grips bulky, irregular, and difficult-to-handle materials.
- ▶ Suitable for organic waste, green waste, scrap steel, and bulky waste streams.
- ▶ Available with tine options to suit different material types.
- ▶ Even clamping action helps maintain load control during transport.
- ▶ Well suited to waste transfer, recycling, composting, and resource recovery operations.

High-tensile steel construction provides strength in demanding waste applications.

Hydraulic clamping system is engineered to apply even pressure across the load.

Tine configurations can be tailored to suit abrasive or material build-up sensitive applications.

Reinforced structure is designed to manage repeated loading cycles and uneven load forces.

Specifications:

Part Number	Width mm	Capacity m ³
WGW.WG2418	2400	1.8
WGW.WG2424	2400	2.4
