

Short Tine Scrub Grapple

The Kerfab Short Tine Scrub Grapple is built for handling lighter scrub, green waste, and general material where control and clean pickup are important. Its interlocking tine design allows operators to grab and hold uneven loads securely while keeping material contained. It's suited to clearing scrub in the paddock, stacking branches in the yard, and transporting waste material.

Key features at a glance:

- ▶ Interlocking tine design provides a secure hold on irregular material during lifting and transport.
- ▶ Multiple widths and tine counts available to suit job requirements.
- ▶ Manual or hydraulic configurations.
- ▶ Range of tine sizes and layouts allows matching to specific scrub and waste handling tasks.
- ▶ Protected hoses and ram placement reduce exposure to damage in working environments.

WARRANTY

Strengthened pivot points support repeated clamping forces and extend service life under regular use.

High-strength steel tine construction balances penetration into material with structural durability.

Interlocking beak and bottom tines are arranged to maintain grip across uneven loads and reduce material loss.

Cross bar reinforcement supports alignment of tines under load and maintains consistent grab geometry.

Specifications:

Part Number	Width mm	Tines in Base	Machine Compatibility
TGT.ST24	2400	10	Telehandler
TGT.ST27	2700	12	Telehandler
UGT.ST18	1800	6	Tractor/Ag Loader
UGT.ST21	2100	8	Tractor/Ag Loader
UGT.ST24	2400	10	Tractor/Ag Loader
UGT.ST27	2700	12	Tractor/Ag Loader
