

Skid Steer Bucket Grapple

The Kerfab Skid Steer Bucket Grapple combines a full bucket profile with independently operating grapple arms, allowing uneven loads to be clamped securely during handling. The bucket supports clean pickup and transport, while optional bolt-on cutting edges provide added durability and pushing capability. Designed for versatility, it handles a wide range of materials across agricultural, waste, and general handling applications.

Key features at a glance:

- ▶ Material can be picked up and secured in one motion, reducing handling steps.
- ▶ Suitable for everything from silage to waste, increasing attachment versatility.
- ▶ Available in widths from 1675 mm to 2000 mm.
- ▶ Optional bolt-on cutting edges provide added durability and pushing capability.
- ▶ Compatible with most skid steer makes and models.

WARRANTY

Hydraulic operation provides controlled closing force, maintaining load stability during transport.

Each arm operates independently, allowing pressure to be applied across uneven material.

Reinforced bucket structure is built to handle both lifting and clamping forces, supporting durability under combined load conditions.

Specifications:

Part Number	Width mm	Machine Size hp
SGW.WG16	1675	35 - 75
SGW.WG18	1830	35 - 125
SGW.WG19	1980	35 - 125
SGW.WG20	2000	35 - 125
