

Skid Steer ITA Pallet Fork

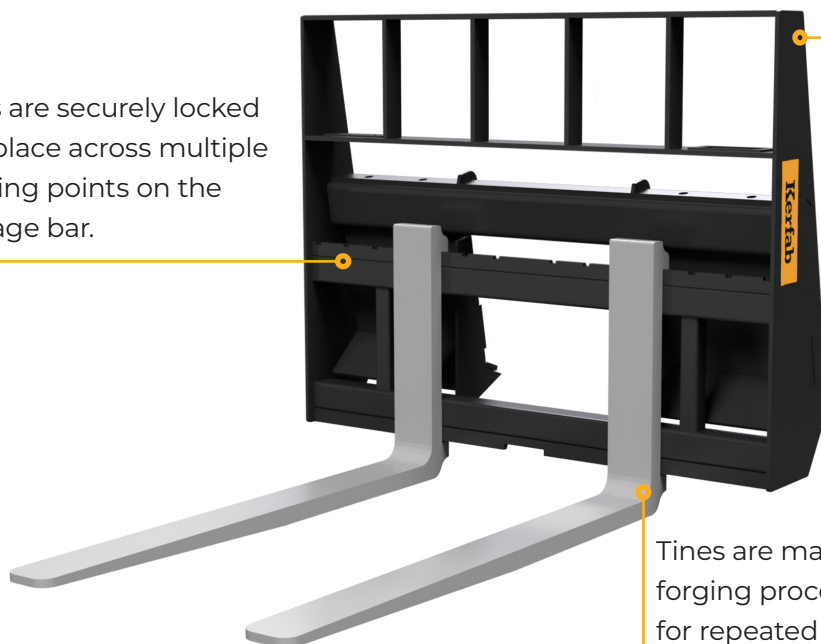

Built for safe, efficient pallet handling in agricultural and construction environments, the Kerfab Skid Steer ITA Pallet Fork combines heavy-duty drop forged tines for strength under load with an open back frame for improved visibility during positioning and lifting. A high backrest ensures load stability, while adjustable tine spacing allows the forks to be matched to a range of pallet sizes. A skid steer pallet fork manufactured to ITA standards allows operators to lift and move pallets with greater control and consistency.

Key features at a glance:

- ▶ Standard 2 year warranty.
- ▶ Various capacities available from 1500kgs up to 2500kgs.
- ▶ Open back frame for improved operator visibility.
- ▶ Durable tine construction supports consistent use across daily operations.
- ▶ Designed for quick, controlled pallet movement across a range of environments.

2 YEAR
STANDARD
WARRANTY

Tines are securely locked into place across multiple latching points on the carriage bar.

A high backrest structure supports load stability and helps prevent pallet movement toward the machine.

Tines are manufactured using a drop forging process, providing strength for repeated lifting under load.

Specifications:

Part Number	Width mm	Capacity kg	Tine Length
