

# Telehandler Adaptor

The Telehandler Adaptor allows operators to connect attachments from different hitch systems, increasing the versatility of a telehandler across a wide range of tasks. It provides a practical solution for sites where multiple attachments are required, helping operators switch between jobs without needing dedicated machines or duplicate attachments.

## Key features at a glance:

- ▶ Enables telehandlers to use attachments from different hitch systems.
- ▶ Helps maximise machine utilisation across a variety of applications.
- ▶ Optional manual or hydraulic locking pin configurations available.
- ▶ Demountable design allows the adaptor to be removed when required.
- ▶ Available to suit a range of telehandler sizes and operating requirements.

**2 YEAR**  
STANDARD  
WARRANTY

Engineered to transfer attachment loads effectively between the telehandler and connected implement.

Manufactured from GR350 steel plate for structural strength and durability.

Robust locking system options provide secure attachment engagement during operation.

Designed to maintain reliable alignment between machine and attachment while supporting straightforward installation and removal.

## Specifications:

| Part Number    | Fits      | Pickup Hitch       |
|----------------|-----------|--------------------|
| TQC.AMJCBQEURO | JCB Q-Fit | Euro               |
| TQC.AMMANIEURO | Manitou   | Euro               |
| TQC.AMMANIJCBQ | Manitou   | JCB Q-Fit          |
| TQC.AMMZM2JCBQ | Merlo ZM2 | JCB Q-Fit          |
| TQC.AMJCBQMANI | JCB Q-Fit | Manitou            |
| TQC.AMJCBQCLA  | JCB Q-Fit | Claas Scorpion     |
| TQC.AMJCBQBOBC | JCB Q-Fit | Bobcat Telehandler |
